

Requirements Elicitation

Elicitation Technique:

A survey conducted with 8 Computer Science students.

Questions & Responses:

1. How often would you use this application?
 - Responses:
 - Daily
 - Every weekday
2. How long would you use the application for?
 - Responses:
 - The average use time was 30 minutes per day.
3. What would you want to see in this application?
 - Responses:
 - A visual dashboard that shows the overall progress among all active TODO lists
 - An easy way to comment on the list
 - Assign priorities on lists
 - Easy and intuitive navigation
4. How would you prefer to be notified about task updates?
 - Responses:
 - Email summaries at the end of each day with updates
 - In-app push notifications for urgent tasks
 - Ability to set notification preferences
5. What is one feature that would make your workflow easier?
 - Responses:
 - Being able to see all assigned tasks in one place
 - Be able to see who's overloaded with tasks and underutilized to be able to balance TODO lists
 - Ability to create templates for TODO lists for similar projects, to reduce repetitive actions
